

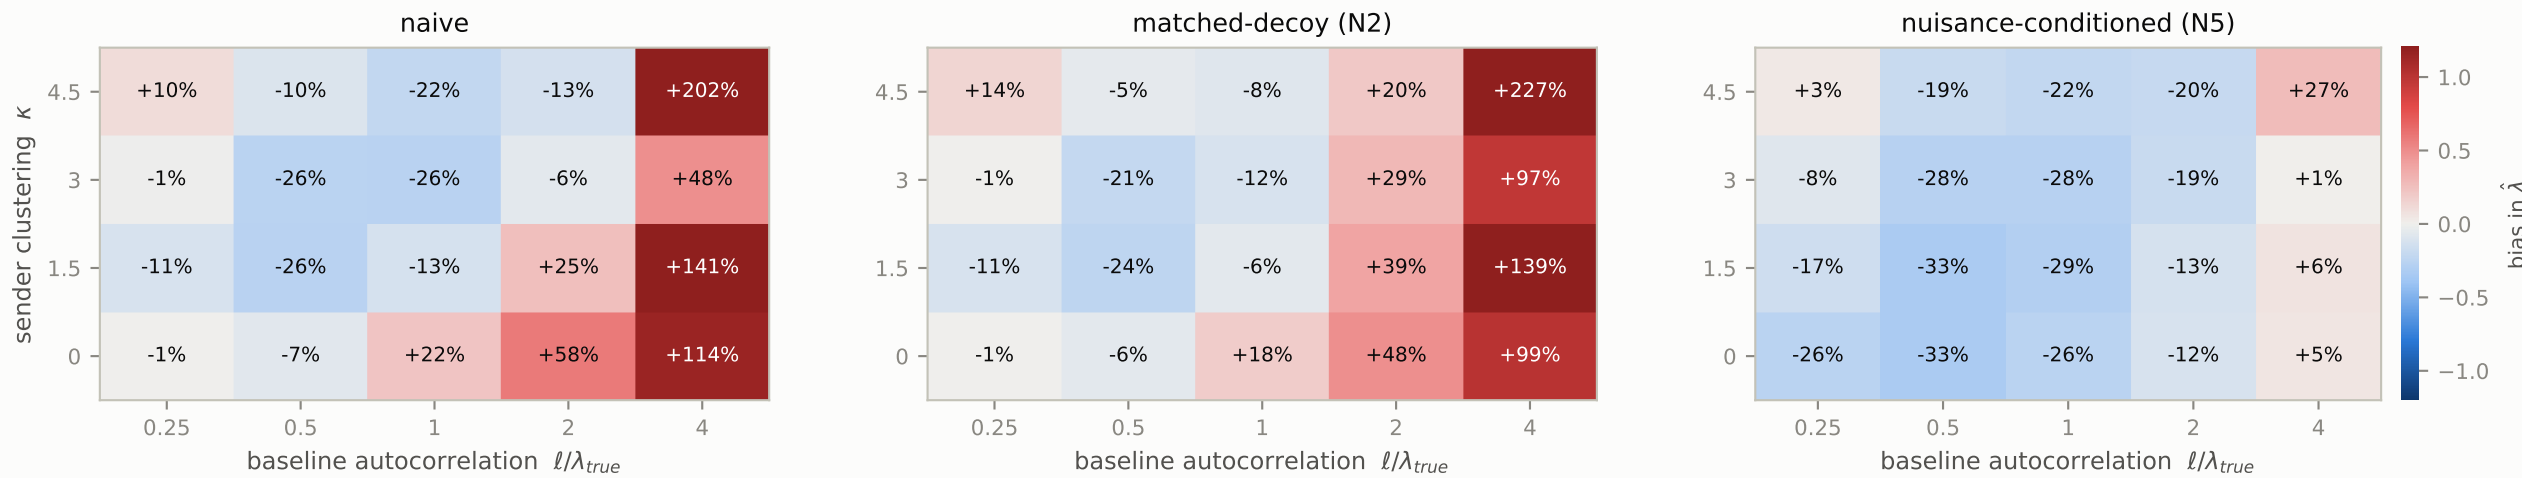

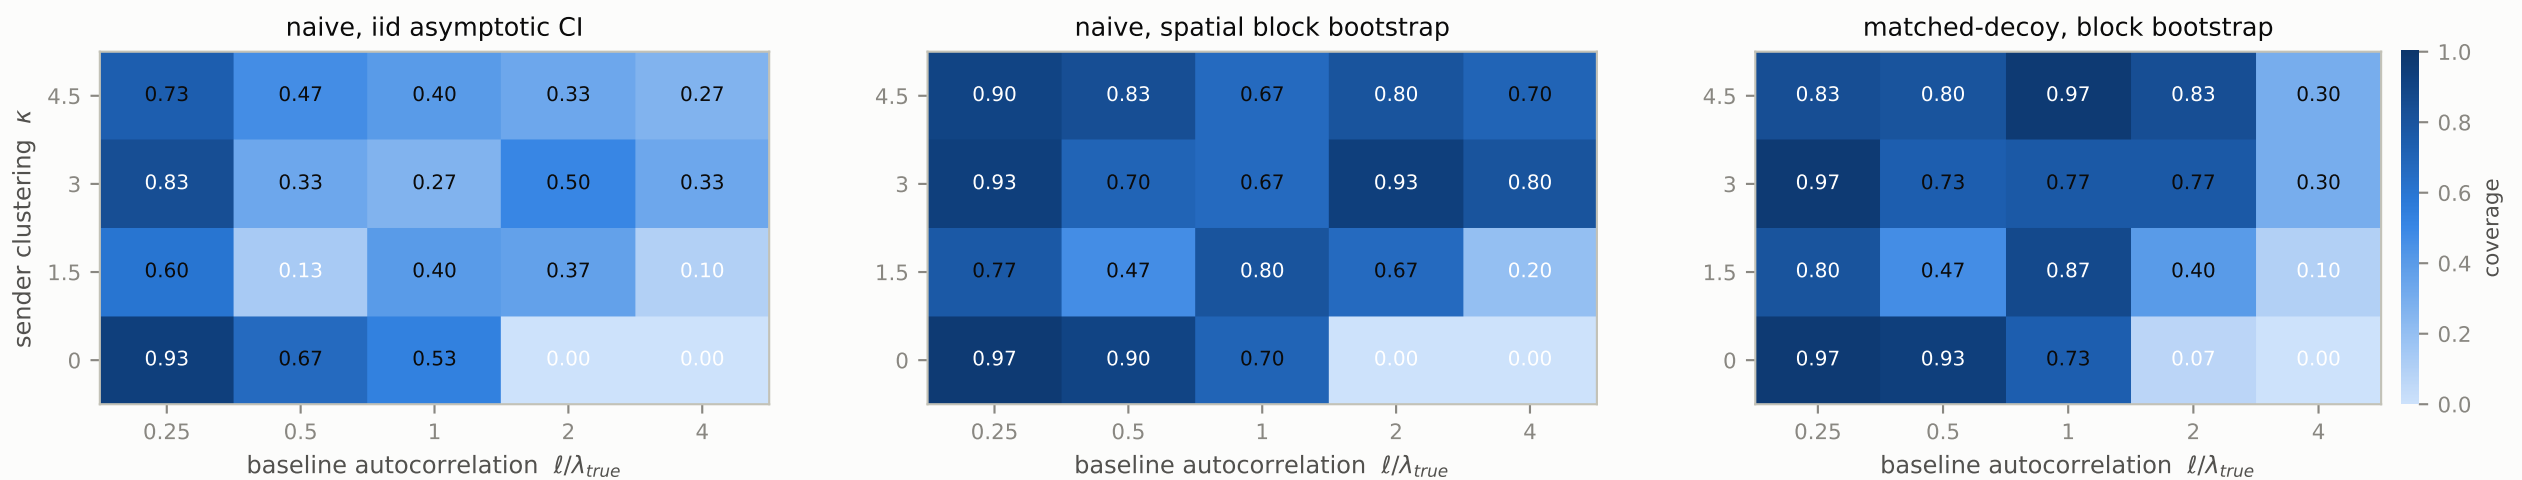

Figure 1 · Identifiability regime map for the SASP spatial response kernel (synthetic tissue)

lambda_true = 30 um, beta_true = 1.0, sender prevalence 5%, confounder on. 30 seeds per grid cell; ~11,900 cells per section, median NN distance 11.7 um.

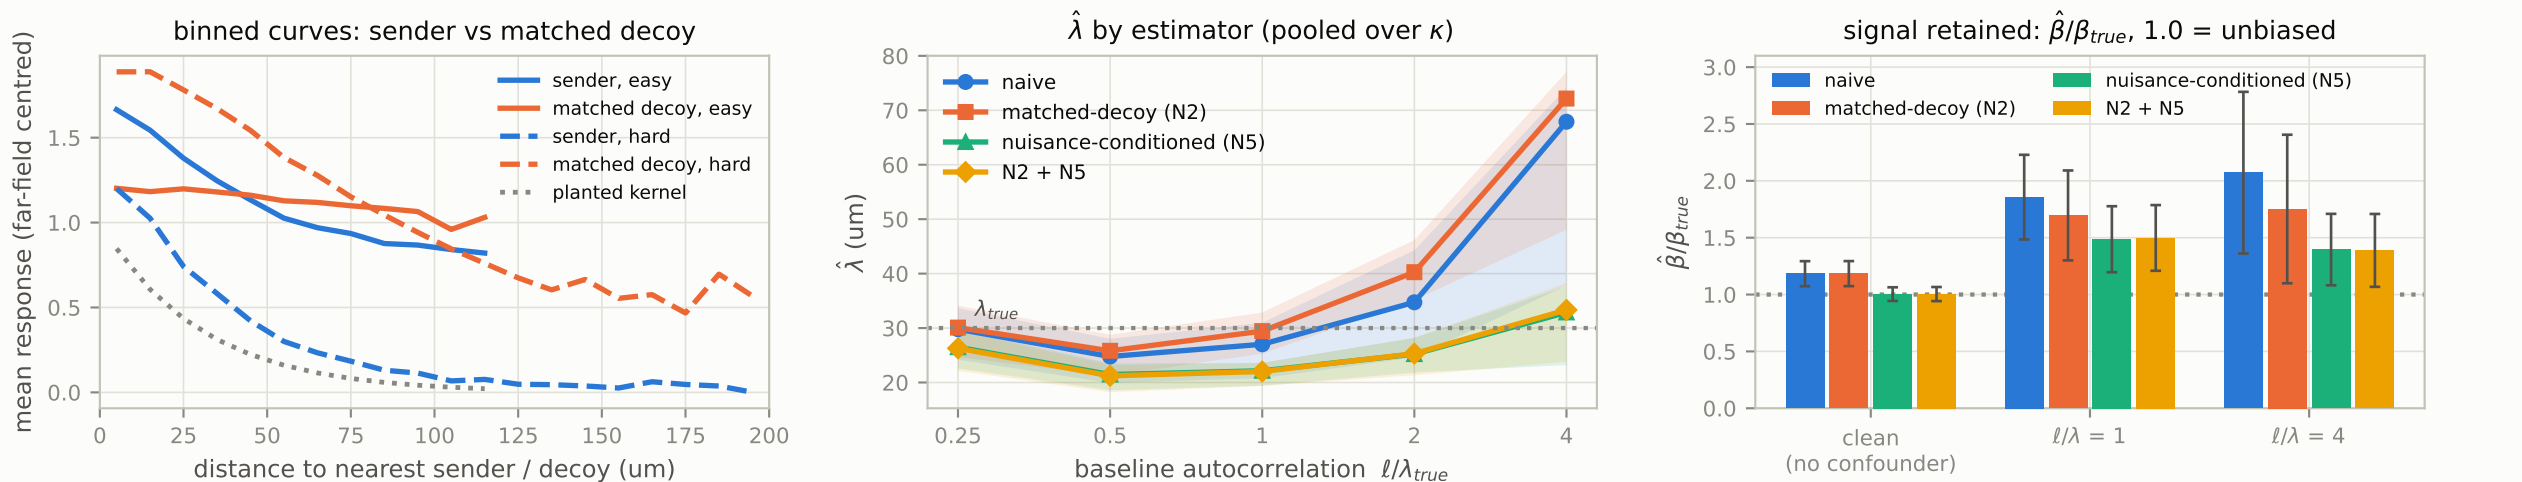

a Relative bias in $\hat{\lambda}$

b 95% CI coverage of λ (nominal 0.95)

c Recovery with and without the matched-decoy control

d Supporting sweeps
